

REPTILES: WANTED--(ALIVE)

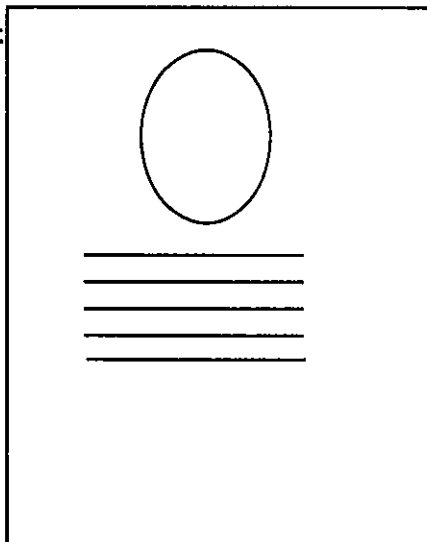

Purpose: To introduce one of the MANY species of reptiles to the class in the form of a poster. The poster will contain descriptive information about the physical appearance, habitat, foods eaten, behaviours and other interesting details. After, we will compare different species to develop a list of commonalities and differences within this class.

Task: Create a "wanted" poster of a researched member of the reptiles.

Include:

- a sketch of the animal
- scientific name
- common name (alias)
- a written description
- where it was last seen
- what it was last seen eating
- favourite "hang-outs"
- distinguishing features
- any other descriptive information (ex. how it moves, noises it makes, where it may be hiding...)
- Reward???? (for the live return of....)

Ex:

Evaluation: Information: 80%
Creativity: 20%
